Terms & Conditions

All prices are subject to change based on several factors such as location, size of asset, scope of project, special content, complexity of the site, and FAA airspace restrictions. Every worksite is different, therefore what imagery can be captured varies. Obstacles such as trees, light poles, structures, power lines, towers, restricted areas and more all factor in to the specific price for the project. Every project opportunity requires a consultation to ensure that you get the desired results.

Vertical Vision will help define the scope of work, determine any specific requirements and quote your project. A preliminary site survey may be required.

Discounts are available when purchasing multiple items per quote.

Preferred customer discounts may apply based on payment history and volume purchases.

If results do not meet your expectations, Vertical Vision will reshoot if possible (one time only) based on more specific definition of your requirements and preferences.

If expected results cannot be achieved once Vertical Vision is on-site, the quote will be revised or the project will be cancelled. A minimal charge may apply based on expenses incurred. Charges are dependent on the reason for the revisions or cancellation and are negotiable.

Itemized (a la carte) Payment Terms:

Choose from the list of items on reverse side.
